STG - (A) United States patent
AB - A method of forming a scratch resistant color ink pattern of multi-color coatings
 (5) onto a see-through panel (6) with exact registration between successive color
 coatings of the pattern. The method of the invention includes the steps of:
 providing a base material (1) having an ink printable release coating on one side
 thereof; applying a first color coating of ceramic ink (75) to the printable release
 coating side of the base material (1); applying at least one additional color
 coating of ceramic ink (76) over at least a portion of the first color coating of
 ceramic ink (75); perforating the base material to provide a pattern of light
 passages (28) therethrough, the light passages (28) defining aligned edges of
 successive color coatings of ceramic inks to ensure exact registration between
 said successive color coatings of ceramic inks; transferring the pattern of color
 coatings of ceramic inks (5) onto a surface of a see-through panel (6); and
 heating the see-through panel (6) to fuse said pattern of color coatings of ceramic
 inks (5) onto said surface of said see-through panel (6). In one embodiment, the
 base material (1) consists of water slide paper and such that the pattern of color
 coatings is wetted and transfered to the the see-through panel by water slide
 transfer. In another embodiment, the base material consists of heat transfer paper
 and the pattern of color coatings is transfered by application of heat and pressure
 or just pressure alone.
